How to change Configuration settings in PhP.ini to work for Liftech OCMS
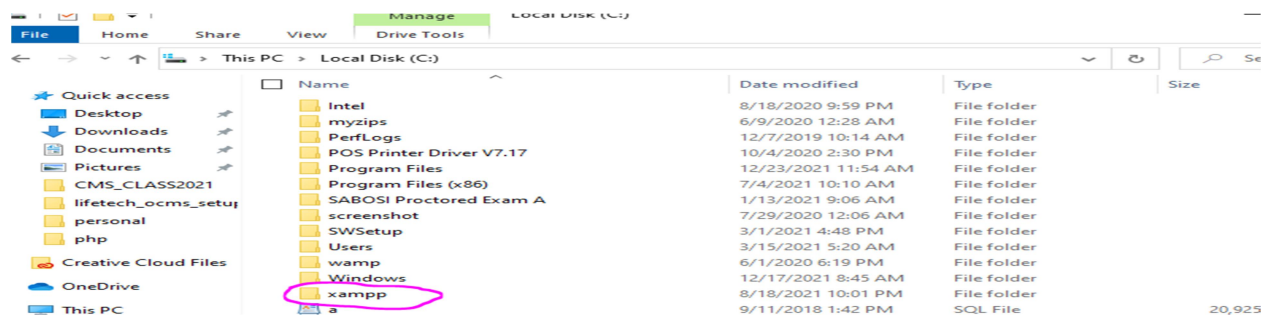

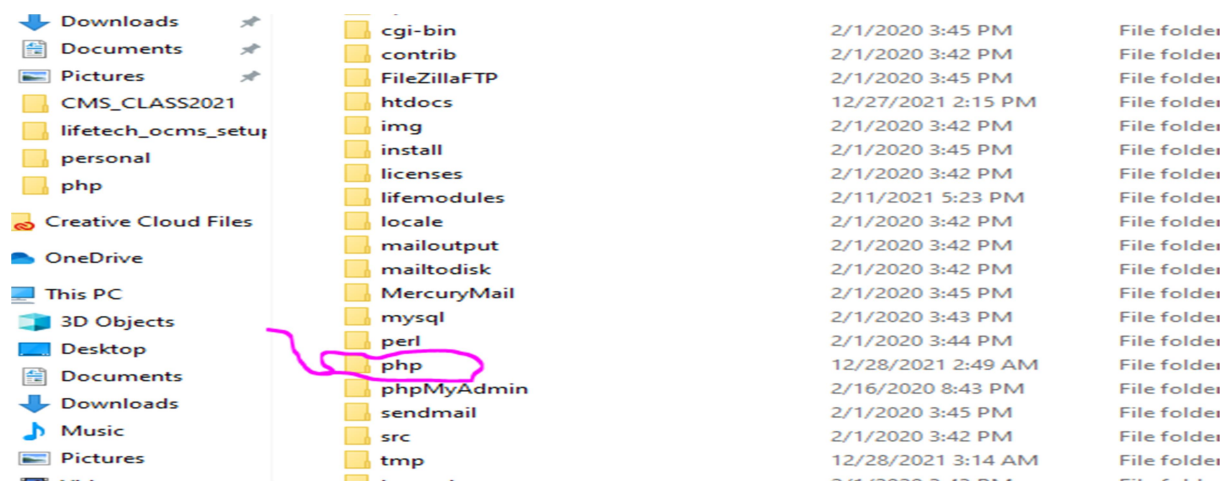

Step1: go to my Computer or This PC

Step 2: Click on your local Disk C://

Step 3: Click on XAMPP Folder

Step 4: Click on PhP Folder

Step 5: Patiently scroll then and look for PhP.ini file that has type of **configuration settings** and open it with word pad or any editor but not **notepad**

Step 6: After opening the file.

    a. You will search for `upload_max_filesize`, the default is `2M` but you will change to atleast lifetech requirement `40M`

```
; specified).
; http://php.net/upload-tmp-dir
upload_tmp_dir="C:\xampp\tmp"

; Maximum allowed size for uploaded files.
; http://php.net/upload-max-filesize
upload_max_filesize=2M

; Maximum number of files that can be uploaded via a single
```

    b. Then search for `post_max_size`, the default is `8M` but you will change to atleast lifetech requirement `50M`

```
; Maximum size of POST data that PHP will accept.
; Its value may be 0 to disable the limit. It is ignored if POST
data reading
; is disabled through enable_post_data_reading.
; http://php.net/post-max-size
post_max_size=8M

; Automatically add files before PHP document.
; http://php.net/auto-prepend-file
auto_prepend_file=

; Automatically add files after PHP document.
```

c. Next search for `max_execution_time, the default is 30 but you will change to atleast lifetech requirement 60`

```
|
; Maximum execution time of each script, in seconds
; http://php.net/max-execution-time
; Note: This directive is hardcoded to 0 for the CLI SAPI
max_execution_time=60

; Maximum amount of time each script may spend parsing request
data. It's a good
; idea to limit this time on productions servers in order to
```

Finally, restart your server for these settings to take effect and refresh your browser to see whether those RED fonts have turned to GREEN fonts, if not you have missed the steps, retry again.
